FEATURES

- Mustad's latest metal lure, the Mezashi Casting Jig, presents enticing erratic action with irresistible reflective patterns
- The translucent colored eye refracts lights to create an attractive natural shine in the water sure to produce a bite
- For an intense wobbling action on retrieval, this jig has been built with an asymmetrical body with a round shape to one side and triangle to the other
- The 45:55 weight distribution only increases the fierce action and unmatched presentation
- Designed in Japan with premium reflective materials
- Perfected by a Mustad UltraPoint® assist hook rigged to the front and an UltraPoint® treble to the rear

MUSTAD SOFT LURES

Take advantage of the latest presentations in salt- and freshwater fishing to match perfectly with Mustad hooks. Our soft lures are built with premium soft plastics materials and designed to create irresistible actions.

MICRO FINESSE SERIES

FEATURES

- Mustad's Micro Finesse Baits excel at displacing water and enticing bites. The range of tail styles give their own unique flutter, wobble, or vibration. Premium soft plastics materials are the backbone of these baits to guarantee durability when rigging repeatedly and landing numerous catches.

FEATURES

- A realistic crawfish imitation is a must-have in any serious bass angler's arsenal. The massive claws on the Rock Lobster vibrate and displace water for maximum attraction.
- Land fish after fish thanks to the durable Japanese PVC, reactive German plasticizer, and flashy American color materials.
- The Mezashi-concept through-eye means that the eyes will stay put after even the toughest mouths.
- Most effective rigged on our new Ultra Drive Jig Head or Weighted KVD Grip Pin® Hook (38101W) for fishing along the bottom. Soft Plastics hook (38101NP) for weedless applications.

FEATURES

- This crab lure features the popular premium TPE used in Mustad's InkVader Jigs for a realistic action and durable construction
- The increased buoyancy from the TPE materials present the bait perfectly in the current when bottom fishing
- Rigged on the Ultra-Drive Jig Head, the bait moves freely from the weight to increase sensitivity and maximize action
- Thanks to the unique jig head design, soft plastics are protected when retrieving along rocky bottoms
- Each pack includes two ready-to-fish lures

FEATURES

- Our Jaw Lok treble's hybrid shape design maximizes gap and hooking power
- Lightest trebles in their class
- Titan Steel finish for extended corrosion resistance with a non-reflective, gun-metal color
- Formed with three single hooks using Mustad's latest automatic welding technology for perfect balance and symmetry
- All Jaw Lok trebles feature an inline eye, making these the ideal hook for your favorite lure

RIGGING VIDEO

THE PRO'S SECRET

Designed, Tested & Proven By Top Walleye Tournament Pros

TO RIG

Attach a bottom-bouncer weight to your main line. Add a 4-6 foot, 10 lb monofilament leader and attach hook. Thread half a night crawler up the hook shank over the hook eye. There should be 1/4" to 1/2" of night crawler hanging off the hook.

TO FISH

Use your trolling motor and keep speeds from 1 mph to almost nothing. The key is to keep just enough speed so the crawler spins. Can also be used effectively when drifting.

APPLICATIONS

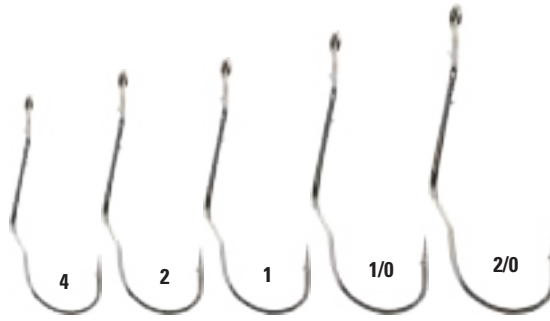

This is a versatile, year-round Power Finesse presentation. It can be fished fast or slow, has the attractiveness of live bait and adds an irresistible action. The unique design creates an enticing corkscrew presentation. This is a slow bottom bouncing presentation technique that lets you present the bait in cracks, crevices and little corners that faster blade presentations skip over.

TO MOVE: Unique sliding weight lets you easily change presentations.

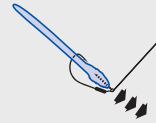

1. Rotate weight several times to heat silicone insert.

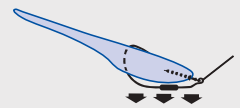

2. Move weight to desired location. As insert cools, weight will be held firmly in place.

Weight Back: Pushes bait backwards under structures like docks or logs. Use with tube baits, crawfish, and jerkbaits.

Weight Forward: Bait sinks "nose down." Use with worms, "Gidzit" and tube baits.

Weight Centered: Bait falls horizontally. Use with jerk baits, tube baits, lizards and worms.

BAIT PRESENTATIONS

BEAK/OCTOPUS HOOK

Wide gap allows bait to swim freely. In-line turned up eye provides great leverage for power hook-sets. Use heavier wire hooks for bigger fish. Lighter wire hooks allow natural bait presentation.

LEECHES

Thread hook through sucker.

NIGHTCRAWLERS

Thread hook through band.

Thread on a piece, leaving one end free.

MINNOWS

Casting—Thread hook point through bottom and top of mouth.

Bobber—Thread hook under dorsal fin.

FLY HOOKS

INTRODUCING BIO-BASED FLY HOOK PACKAGING

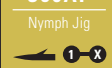

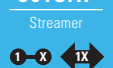

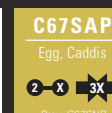

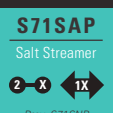

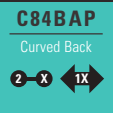

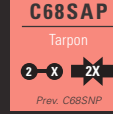

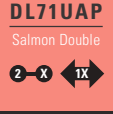

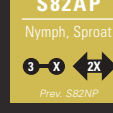

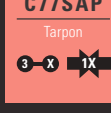

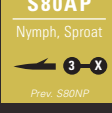

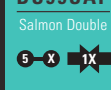

To reduce Mustad's impact on the waters, our latest fly hook range has launched in bio-based plastic packaging.

Rather than plastic bags, we've chosen a durable, reusable box made of Polylactic acid (PLA) plastics, which is 100% biodegradable and compostable under certain conditions. PLA is extracted from natural, renewable resources like corn, potatoes, and beets. Not only is it made from sustainable materials, but also uses significantly less energy to produce while generating much fewer greenhouse gases.

Fly tiers will welcome the reusability of our new, robust fly hook boxes. Heritage Fly Hooks are packed for easy access and stack well on fly tying workbenches. Sort packs by type with the improved color-coding and specification visible where it's needed most.

FASTACH™ WEIGHTS

The Mustad Fastach™ system makes hook and bait changes quick and easy. Simply twist off your hook for express bait changing out on the water. The Fastach jig system gives your bait super natural movements in the water and works on all modern soft baits. Works great with the Mustad Grip-Pin® series of hooks for ultimate action and reliability.

MUSTAD JIGGING ASSIST RIGS

Mustad offers a comprehensive range of options for vertical jigging tactics, featuring four rig styles in a combination of sizes to match a variety of techniques, including light, slow pitch, vertical, and heavy jigging. Along with high quality UltraPoint™ hooks, we only use the best PE and Kevlar materials to produce these rigs. All rigs come dressed with either tinsel, reflective paper, or glow beads for added flash.
